

BOAT STANDS

Boat stands are used as **stabilizers**. Use blocking fore and aft to support all weight of the boat on the keel. For powerboats use a minimum of 2 pair of stands, plus an additional pair of **boat stands** for every 3 m of boat length over 6 m. The weight of the boat rests on its keel, supported by **keep stands**, **benches**. **Our stands** have been independently **tested** and have a **certified** safe working load of **3600 kg**.

All our boat stands are **manufactured** in **two variants**. With **fine** and **rough** regulation

Choose from **hot dip galvanized** or **black painted**.

BOAT DOLLIES

B2400LB/B4000LB

The **B2400LB / B4000LB** boat dollies are the perfect option to store or display lighter boats. With easy to roll casters bolted in each corner this dolly makes moving boats into tight spaces effortless.

Model: **B2400LB / B4000LB**
Max Capacity: **2400 / 4000 kg**
Dimension: **150 cm / 300 cm**
Final protection: **hot dip galvanized / black painted**

B900NB

The **900NB** boat dolly is the perfect solution for small boats and jet ski if you are looking for more space in your showroom. Total holding capacity is 900 kg. Our removable pins make adjusting this dolly to fit your boat a simple process.

Model: **B900NB**
Max Capacity: **900 kg**
Dimension: **140 cm / 97 cm**
Final protection: **hot dip galvanized / black painted**

B2400NB/B3200NB

The **2400NB / 3200NB** boat dolly is the perfect solution if you are looking for more space in your showroom. Total holding capacity of 2400/3200 kg per pair these dollies are able to support most boats in market. Our removable pins make adjusting this dolly to fit your boat a simple process.

Model: **B2400NB / B3200NB**
Max Capacity: **2400 / 3200 kg**
Dimension: **600 cm / 940 cm**
Final protection: **hot dip galvanized / black painted**

B4000HB/B6000HB

The **B4000HB / B6000HB** boat dollies has a heavy duty steel design allowing it to not be damaged under a heavy load. Total holding capacity of 4000/6000 kg per pair these dollies make able to support most boats. Our removable pins make adjusting this dolly to fit your boat a simple process.

Model: **B4000HB / B6000HB**
Max Capacity: **4000 / 6000 kg**
Dimension: **810 cm / 910 cm**
Final protection: **hot dip galvanized / black painted**

KEEL SUPPORT

Keel support are the simplest storage solution, for safely store boat for **service** or **washdown**. It is recommended for boats up to **9,100 kg**. The best rests on the flat bench and the stern is supported by two fixed pads creating a safe and stable platform.

All our boat stands are **manufactured** in **two variants**. With **fine** and **rough** regulation.

Choose from **hot dip galvanized** or **black painted**.

HYDRAULIC BOAT JACK

A pair of **hydraulic boat jacks** creates the **fastest** and the **easiest** way to **lift a boat** weighing up to **5 600 kg**. Each jack is optimal for lifting up to **1 400 kg**.

KEY BENEFITS:

- **simple, safe** solutions for removing the trailer from under the boat
- **no need to wait for crane** to removing a trailer for painting, repair and storing a boat
- **10 - minute** boat replacment
- pneumatic tires **roll easily** over gravel, cement and black top
- it can be used in dirt, gravel, cement and black top
- **powerful hydraulic ram** jacks make easy lifting
- lifts boat up to **5600 kg** using **4 jacks**

SPECIFIKATIONS:

- each jacks are **optimal for lift** up to 1 400 kg
- **weight limit** of boat: 5 600 kg
- **range of lifting**: 50 - 130 cm
- max **arm extension**: 40 cm

PRODUCT INFORMATION:

- L x H x V - 0,5 x 1,3 x 0,85 m
- weight - 110 kg

INBOARD BOAT STANDS

Boat stands are used as **stabilizers**. Our **3 stands system** is perfect for displaying **inboard boats**. Use blocking fore and aft to support all weight of the boat on the keel. It can be only used on **V - Drive** application.

Our **stands** have been independently **tested** and have a **certified** safe working load of **6000 kg**.

Choose from **hot dip galvanized** or **black painted**.
